

52 *Elaeagnus angustifolia* Semi-natural Woodland
Russian Olive Semi-natural Woodland

Association:

-*Elaeagnus angustifolia* Semi-natural Woodland

Common species:

Elaeagnus angustifolia
Salix exigua
Populus fremontii
Tamarix spp

Project Specifics:

Frequency = 43 total polygons
1 polygons ZION, 42 polygons Environs
Area = 73 total acres
0.7 acres ZION, 72 acres Environs
Average Size = 2 acres

Photo Signature Example

Description:

This map class is limited to one known location in ZION but is more prevalent outside the Park on the Virgin River Floodplain. The blue-gray color of the Russian olive foliage is very distinctive on the true color aerial photography. In some places, small patches may have been over looked or mapped as another deciduous floodplain woodland map classes. In the Environs this type often intermingled with the salt cedar shrubland map class.
